

StandOut Video Interviewing Practice

Help Your Students Nail Their Job Interviews!

Enhance your students' interviewing skills and career opportunities while improving employment outcomes for your institution. *StandOut*® video interviewing practice features the latest video AI technology that helps students identify areas for improvement, build confidence, and prepare to stand out in the job market.

Anytime Practice for Busy Students

With StandOut at your career center, you enable students to stop in and practice at their convenience, as often as they choose. And, since there's no instruction or supervision required, there are no added demands on your time. StandOut is a great way to encourage students to use other Career Center services, too.

AI Technology Builds Students' Confidence

StandOut's patented AI speech analysis provides students crucial feedback on attributes such as clarity and fluency, and allows them to track their progress. By identifying areas for improvement and enabling repeat practice, StandOut ensures students are well prepared to make the best possible impression.

Scalability and Unlimited Interview Options

With StandOut, you can create your own customized interviews applicable to any career field. Or simply choose among our extensive library of pre-recorded interviews. The StandOut system easily scales to meet the unique needs of schools across your campus or to facilitate general career preparation courses.
